

ANGAD DHIMAN

Technical Program Manager | AI Products

New Delhi, India • +91 9138420299 • angaddhiman10@gmail.com • angad-23.github.io/portfolio • linkedin.com/in/angaddhiman

PROFESSIONAL SUMMARY

Technical Project Coordinator with 3+ years across AI product delivery and enterprise IT. Currently leading Generative AI feature delivery and US school-district integrations for a B2B2C EdTech platform. Shipped 3 GenAI features that cut content-creation time by 40% and raised sprint predictability by 50%. M.Tech in Computer Science with applied research in real-time ML model serving.

EXPERIENCE

AI Product Management | Technical Project Coordinator

Jan 2025 - Present

Trivium Education Services Pvt. Ltd.

New Delhi (Hybrid)

Own discovery-to-launch delivery for AI features and district integrations on a US-facing B2B2C EdTech platform (1,000+ active users), working with 5 engineers.

- Proposed and launched 3 Generative AI features (lesson planning, study notes, quiz generation), securing executive sign-off and cutting content-creation time by 40%.
- Wrote engineering-ready PRDs and functional specs for each feature; partnered with tech leads on LLM prompt design, output quality checks, and API latency vs. cost trade-offs.
- Introduced sprint planning, backlog grooming, and cross-team dependency mapping, improving sprint predictability by 50% (committed vs. delivered story points, from 55% to 83%).
- Managed technical delivery of Clever and ClassLink integrations with automated OneRoster roster sync, across 10+ US school districts.
- Drove rollout of SSO using OAuth 2.0 and SAML, removing separate logins for students and teachers and keeping data handling aligned with FERPA and COPPA.
- Served as primary technical contact for US district IT administrators, resolving data-mapping edge cases and translating district requirements into engineering tickets.

Technical Support Engineer

Aug 2023 - Jan 2025

Fareportal India Pvt. Ltd.

Gurugram (Hybrid)

Supported enterprise IT and identity systems for 1,000+ employees across global offices.

- Monitored network and enterprise systems and resolved priority incidents within SLA, contributing to 99.9% service uptime.
- Administered Active Directory, Office 365, and role-based access control (RBAC), enforcing least-privilege access for joiners, movers, and leavers.
- Redesigned the employee provisioning and onboarding workflow, reducing onboarding ticket resolution time by 35%.
- Acted as first point of contact during critical system outages, triaging incidents and coordinating with teams to restore service within SLA.

RESEARCH & APPLIED PROJECTS

In-Process vs. REST Model Serving for Real-Time Fraud Scoring

M.Tech Research

- Benchmarked 11 serving configurations for a fraud-detection model, isolating inference engine (scikit-learn, ONNX Runtime, Smile), runtime (Python vs. JVM) and transport (in-process vs. REST); 5,000 calls per configuration across 3 runs.
- Showed the inference engine dominates latency: the same random forest scored in $\sim 25 \mu s$ with ONNX Runtime vs. $\sim 4 ms$ with scikit-learn (109–174x faster), with no JVM advantage over Python on the same ONNX model.
- Quantified local REST overhead at ~ 0.7 – $0.9 ms$ per call and showed a naive Flask dev-server baseline was 5–11x slower than a tuned waitress service; verified cross-language score parity (max deviation 3.6×10^{-7}).
- Trained on the 1M-row Bank Account Fraud dataset (1.1% fraud) with a temporal split; controlled hybrid-core and OS power-throttling artifacts ($\sim 3x$ error); code and data on [GitHub/Zenodo](#).

EDUCATION

Master of Technology (M.Tech), Computer Science & Engineering

2024 - 2026

Chandigarh Engineering College (CGC), Mohali - CGPA: 8.6/10

Bachelor of Technology (B.Tech), Information Technology

2019 - 2023

Chandigarh Engineering College (CGC), Mohali - CGPA: 8.0/10

CORE SKILLS

- Program & Product Management:** Technical Program Management, Product Roadmaps, PRDs, User Stories, Feature Prioritization, Agile/Scrum, Sprint Planning, Backlog Management, Dependency & Risk Management, Stakeholder Management, KPIs
- AI & ML:** Generative AI, Large Language Models (LLMs), Prompt Engineering, Model Serving, Deep Learning, Latency Optimization
- Technical:** Python, Java, Spring Boot, REST APIs, Postman, SQL, Deep Java Library (DJL), FastAPI, Flask, Azure
- Integrations & Security:** SSO (OAuth 2.0, SAML), Clever, ClassLink, OneRoster, Active Directory, Office 365, RBAC, ITSM
- Compliance & Tools:** FERPA, COPPA, Data Privacy, Jira, Confluence, ConnectIT
